WARNING

CARBON MONOXIDE POISONING CAN BE DEADLY

CARBON MONOXIDE IS A COLORLESS, ODORLESS, DEADLY POISONOUS GAS WHICH, WHEN BREATHED, DEPRIVES THE BODY OF OXYGEN AND CAUSES SUFFOCATION. EXPOSURE TO AIR CONTAMINATED WITH CARBON MONOXIDE PRODUCES SYMPTOMS OF HEADACHE, DIZZINESS, LOSS OF MUSCULAR CONTROL, APPARENT DROWSINESS, COMA. PERMANENT BRAIN DAMAGE OR DEATH CAN RESULT FROM SEVERE EXPOSURE.

IT OCCURS IN THE EXHAUST FUMES OF FUEL-BURNING HEATERS AND INTERNAL-COMBUSTION ENGINES AND BECOMES DANGEROUSLY CONCENTRATED UNDER CONDITIONS OF INADEQUATE VENTILATION. THE FOLLOWING PRECAUTIONS MUST BE OBSERVED TO INSURE THE SAFETY OF PERSONNEL WHENEVER THE PERSONNEL HEATER, MAIN, OR AUXILIARY ENGINE OF ANY VEHICLE IS OPERATED FOR MAINTENANCE PURPOSES OR TACTICAL USE.

- 1. DO NOT** operate heater or engine of vehicle in an enclosed area unless it is **ADEQUATELY VENTILATED.**
- 2. DO NOT** idle engine for long periods without maintaining **ADEQUATE VENTILATION** in personnel compartments.
- 3. DO NOT** drive any vehicle with inspection plates, cover plates, engine compartment doors removed unless necessary for maintenance purposes.
- 4. BE ALERT** at all times during vehicle operation for exhaust odors and exposure symptoms. If either are present, **IMMEDIATELY VENTILATE** personnel compartments. If symptoms persist, remove affected personnel from vehicle and treat as follows: expose to fresh air; keep warm; **DO NOT PERMIT PHYSICAL EXERCISE**; if necessary, administer artificial respiration.

THE BEST DEFENSE AGAINST CARBON MONOXIDE POISONING IS ADEQUATE VENTILATION.

ORGANIZATIONAL MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1. Scope.

This manual is a list of repair parts and special tools required for the performance of Organizational Maintenance of the M274 series of vehicles.

2. General.

This repair parts and special tools list is divided into the following sections:

a. Prescribed Load Allowance List (PLA)—Section II. A consolidated listing of repair parts quantitatively allocated for initial stockage at the organizational level.

b. Special Tools, Test and Support Equipment List—Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational level.

c. Repair Parts List—Section IV. A list of repair parts authorized for the performance of maintenance at the organizational level.

d. Federal Stock Number and Part Number Index—Section V. An index of FSN's to illustrate figure and item numbers.

Figure 1. M274 series vehicle—left front view.

3. Explanation of Columns.

The following provides an explanation of columns in the tabular lists in sections II, III and IV:

a. Source, Maintenance, and Recoverability Codes (column 1).

(1) Source Code, column 1a, indicates the selection status and source for the listed item. Source codes are:

Code	Explanation
G	Applied to major assemblies which are procured with PEMA funds for initial issue only, and are used as exchange assemblies at direct and general support-maintenance level. These assemblies will not be stocked above general support-maintenance level or returned to depot-supply level.
M	Applied to repair parts which are not procured or stocked as separate supply items but are to be manufactured at the indicated maintenance levels. The lowest maintenance level authorized to manufacture the item will be entered in the second-digit position of the source code.
P	Applied to high-mortality repair parts which are procured by, stocked in, and supplied from, the military supply system and which are not considered insurance-type items.
P2	Repair parts which are procured and stocked for insurance purposes because the combat or military essentiality of the end item indicates that a minimum quantity be available in the supply system.
X1	Applied to repair parts which are not procured or stocked, the requirement for which will be supplied by use of the next higher procured and stocked assembly or component.
X2	Applied to repair parts which are not procured or stocked, the requirement for which will be filled through cannibalization and salvage sources.

(2) Maintenance Code, column 1b, indicates the lowest category of maintenance authorized to install the listed item. The maintenance level code is:

Code	Explanation
O	Indicates organizational - maintenance level providing local end item repair and return-to-service or on-site repair service.

(3) Recoverability Code, column 1c, indicates whether unserviceable items should be returned

for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applied to repair parts and assemblies which are repaired at direct and general support-maintenance levels. These repair parts which are not economically repairable at depot level will be recovered at the direct and general support-maintenance levels, and will be replaced from supply on an exchange basis.
T	Applied to high-dollar value repair parts which are subject to special handling and are most economically repaired, overhauled, or rebuilt at depot-maintenance level. These repair parts will be recovered at the depot-maintenance level and will be replaced from supply on an exchange basis.
U	Applied to repair parts specifically selected for salvage because of precious metal content, critical materials, high-dollar value, reusable casing or casting material, etc. These repair parts will be recovered at the maintenance level prescribed by the commodity command.

b. Federal Stock Number, column 2, indicates the Federal stock number for the item.

c. Description, column 3, indicates the Federal item name and a brief description of the item. The abbreviation "w/e," when used as a part of the nomenclature, indicates the Federal stock number includes all armament, equipment, accessories, and repair parts issued with the item. A five-digit manufacturer's or other service code and part number is included in parentheses for reference. Repair parts quantities included in kits, sets, and assemblies are shown in front of the repair part name.

d. Unit of Issue, column 4, indicates the unit used as a basis of issue, e.g., ea, pr, ft, yd, etc.

e. Quantity Incorporated in Unit Pack, column 5, indicates the actual quantity contained in the unit pack.

f. Quantity Incorporated in Unit, column 6, indicates the quantity of repair parts in an assembly.

g. 15-Day Organizational-Maintenance Allowances, column 3 of section II, and column 7 of sections III and IV, are as follows:

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the

total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have no entry in the allowance columns but will have in the description column a reference to the first appearance of the item. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represent one initial prescribed for a 15-day period, for the number of equipments supported. Units and organizations authorizing additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the density column applicable to the number of items supported, to obtain the total quantity of repair parts authorized.

(3) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded for exception or revision to the allowance list. Revisions to the range of items authorized will be made by the

Commanding General, U.S. Army
 Tank-Automotive Command
 Warren, Michigan 48090

ATTN: AMSTA-TP

based upon engineering experience, demand data, or TAERS information.

h. Illustration, column 8, is divided as follows:

(1) Figure Number, column 8a, indicates the figure number of the illustration in which the item is shown.

(2) Item or Symbol Number, column 8b, indicates the callous number used to reference the item in the illustration.

4. Special Information.

a. The following publications pertain to M274 series vehicles and their components:

TM 5-2805-213-14	Operator, Organizational, DS and GS Maintenance Manual—Engine Gasoline
TM 5-2805-213-24P	Organizational, DS and GS Maintenance Repair Parts and Special Tools List—Gasoline Engine
TM 9-2320-246-10	Operator's Manual
LO 9-2320-246-12	Lubrication Order
TM 9-2320-246-20	Organizational-Maintenance Manual

b. Identification of the useable-on codes included in column 2 of Section II (PLA) of this publication are:

<i>Code</i>	<i>Used on</i>
A	M274A2
B	M274A8
C	M274A4
D	M274A5

5. How To Locate Repair Parts.

a. When Federal stock number is unknown:

(1) *First.* Using the table of contents, determine the functional group or subgroup, i.e., engine assembly, front or rear assembly, within which the repair part belongs. This is necessary because separate illustrations are prepared for functional groups or subgroups, and listings are divided into functional groups.

(2) *Second.* Find the repair part illustration in the back of the publication covering the functional group or subgroup to which the repair part belongs.

Note. Do not bypass this part of the procedure. Positive identification of the repair part is required.

(3) *Third.* Identify the repair part on the illustration, and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the repair parts listing, find the functional group or subgroup of the repair part and the illustration figure and item number as noted on the illustration.

b. When Federal stock number is known:

(1) *First.* Using the Index of Federal Stock Numbers to illustration figure and item number, find the FSN. This index is arranged in FSN sequence cross-referenced to illustrate figure and item number.

(2) *Second.* Using the repair part listing, find the functional group or subgroup of the repair part and the illustration figure and item number as noted in the Index of Federal Stock Numbers.

6. Abbreviations and Symbols.

a. Abbreviations.

<i>Abbreviations</i>	<i>Explanation</i>
approx -----	approximate(ly)
assy -----	assembly(ies)
cross-recess fl-hd	cross-recess fillister head
cross-recess oval-hd	cross-recess oval head
cross-recess pan-hd	cross-recess panhead
dia -----	diameter
ea -----	each
ext-teeth -----	external teeth (lockwasher)

<i>Abbreviations</i>	<i>Explanation</i>
fig -----	figure(s)
ft -----	foot (feet)
h -----	high
hd -----	head
hex -----	hexagon(al)
hex-hd -----	hexagon head
hex socket -----	hexagon socket
id -----	inside diameter
in. -----	inch(es)
int-teeth -----	internal teeth
lb -----	pound(s)
lg -----	length(long)
lh -----	left hand
max -----	maximum
nin -----	miniature, minimum, minute
nom -----	nominal
od -----	olive drab, outside diameter (dimension)

b. Symbols.

<i>Symbols</i>	<i>Explanation</i>
≠ -----	as required

7. Federal Supply Codes.

<i>Federal Supply Codes</i>	<i>Manufacturers</i>
19207	U.S. Army Tank—Automotive Command
88044	Aeronautical Standards Group, Depts. of the Navy and the Air Force
96906	Military Standard

8. Reporting of Equipment Publication Improvements.

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 and forwarded direct to: Commanding General, US Army Tank-Automotive Command, ATTN: AMSTA-M(NMP), Warren, Michigan 48090.
